Sprint #1
Product Name: LifeTrackerRPG
Team Name: Three n'a Half Asians
Date: 10/20/19

Actions to Stop Doing: Relying heavily on online messaging for collaboration

Actions to Start Doing: Arrange more frequent in-person check-ins and progress reports of what everyone is doing. Arrange more in person meetup sessions to collaborate and work on deliverables

Actions to Keep Doing: Researching about the technologies, gain a better understanding of activity life cycles.

Work completed/not completed: Everyone in our group has a stronger understanding on Android Studio than at the beginning of the sprint. Research was conducted on how to utilize Google Maps API and Firebase for the purpose of our mobile app.

Work completion rate:
1. Able to set up the Google maps api and run it on the phone. Around 2 hours of work split between a week.
2. Learned about Android Development (ongoing process). Indefinite.
